

TRANSFORM 2019

Event HONG KONG
Conference and Exhibition

September
25 – 27, 2019

Conference Theme: Megacities – resilient solutions for electrical power supply

Main Topics: Lifetime Management, Overload Capability and Efficiency

3 TOP BENEFITS

- Get access to an exclusive Megacities Study
- Get full access to the TRANSFORM Innovation Lab and explore the latest solutions
- Get key insights on the latest technical innovations

1. Get access to an exclusive Megacities Study

- ✓ Requirements of established and also fast growing megacities
- ✓ Holistic analysis of the needs of the power grid
- ✓ Definition of key focus areas to solve the city planning issues from today and tomorrow

2. Get full access to the TRANSFORM Innovation Lab and explore the latest solutions for

- ✓ Complex grid operation and control
- ✓ Innovative Transformer equipment for resilient power transformers enabling a dynamic and flexible grid operation at increased reliability
- ✓ Cost optimized asset management by online monitoring and condition assessment based on analysis and intelligent algorithms

3. Get key insights on the latest technical innovations for

- ✓ Lifetime Management
- ✓ Overload capability
- ✓ Efficiency

Why attend?

- Benefit from 21 sessions of dedicated content
- Take away lessons learned, valuable case studies and key insights from peers
- Interact with the key players in the transformer and transformer component industry to address your pain points and to challenge the industry with your specific needs
- Become part of the international TRANSFORM expert community
